

11TH ANNUAL

WOUND HEALING: SCIENCE AND INDUSTRY

Influential leaders in the field of wound healing present an intimate, interactive 3-day program of innovation and idea exchange

Save These Dates!
December 10, 11 & 12, 2010

WOUND HEALING: SCIENCE AND INDUSTRY provides a unique collaboration between academia and industry in a setting and scale conducive to professional interaction. The presentation topics that have been selected by the program committee are based on research developments and emerging trends that have immediate impact on the field of wound care. Researchers from both Industry and Academia are encouraged to present in platform or poster format.

THE 3-DAY CONFERENCE FEATURES 8 SYMPOSIA:

- Micromechanical Strain
- Regenerative Medicine
- Systemic Intervention
- Inflammation/Innate Immunity
- Emerging Therapies
- Peptides-Small Molecules
- Chronic Wound Biology
- Critical Limb Ischemia

PRESENTATION TOPICS INCLUDE:

- Extracellular Matrix
- Gene Therapy
- Stem cell/ precursor cell therapy
- Micro RNAs
- HIF modulators
- Comparative Effectiveness Research
- Wound Biofilms
- Diabetes and Oxidative Stress
- Angiogenesis
- Electromagnetic Fields
- Biopolymers

PROGRAM COMMITTEE:

Peter Sheehan, MD, *Program Chairman*
I. Kelman Cohen, MD
Robert Kirsner, MD, PhD
Jeffrey Davidson, PhD
William Marston, MD
Christopher Attinger, MD
Oscar M. Alvarez, PhD
Marjana Tomic-Canic, PhD
Aristidis Veves, MD, DSc.

To be held at:

WYNDHAM
SUGAR BAY
RESORT & SPA

St. Thomas, U.S. Virgin Islands
